

## Year 6 Newsletter

For the past few weeks we have been looking at the brain and how people learn. We have learnt about the role of neurons and how they make connections and transmit information, and how to best strengthen these connections, thus helping us learn.

We have also learnt about the different parts of the brain and their roles within the body.

The next topic we will be doing is called, 'Home country, Host country'. We will be looking at where we all live, Sweden and where we all come from. We will be looking at geographical locations, landmarks, climates, famous people and many other aspects.
